It is estimated that the entire gost of the building will amount to \$17,000, which, taking into consideration the general impovcrished condition of the people, shows no small degree of energy and zeal on the part of those interested in the structure. We understand that want of sufficient funds will probably cause some delay in preparing the windows, in the manner wished for and intended, but the deficiency will be remedied in a way that will answer every purpose, until more prosperous times will justify the expense necessary to place then in condition to correspond with the

During the past year, we have e induct very much disturbed the members of the church, while engaged in taking the Sacrament of the Lords Supper.

Upon being requested by some gentlemen present, to stop such outrageens and sacritegious conduct, they became very intich incensed and at one time affairs threatened a serious termination. Since then, we understand, the whole neighbor hand has become very excited on the subject, awing to the continued threatening and inschant conduct of the negroes, and the propriety of asking a milliary force for their protection has been seriously discussed by the citizens, This action we would deprecate, until

REPORT OF COMMITTEE, APPOINTED TO INVESTIGATE THE CONDITION OF THE NEW Jall .- To Henry T. Clark, Chairman of the County Court of Edgecombe,

In pursuance to an appointment made by you as chairman of the Court, constituting as a Committe to examine the condition of the public Jail of this county, we the undersigned beg leave to submit the following as our report.

First; as to the brick work, we, after a careful examination, report that so far as the material is concerned, we flad that good, but find that the execution of the work deficient in this, that the joints of mortar between the bricks are considerably wider than they should be and is much | kind of fruit, of which six weighed cach damaged by frost.

Second, As to the wood-work, we find that in this, proper majerial has been used. but in our opinion the execution of the work has not been done in a work-man-like manner; the general character of the work being rough and incomplete. The stair ease we find, not properly constructed and is its present condition ought not to be accepted, because of the improper greention of the work.

We find the material in the flooring all good and the work done well. Your Committee would respectfully call the attention of the Court to the fact, that they find that there are three outside winws to the Jail, through which persons the outside can convey any tools to g the Jail unsafe in this respect,

THE CELEBRATED Arrow Tie AND PAINTED IRON BANDS FOR BALING COTTON.

THE PAINTED BANDS AND "AR. ROW TIES" are a complete substitute for Rope in baling Cotton. They are cheaper than rope-are festened quicker, and hold the bale 1 to 1 less in size than rope -can be instantly adapted to the size of any bale whilst in the press as quickly and with the same gase as rope. These bands are thoroughly painted and ire not subjected to damage that can impair heir efficiency, and being adapted to bales made by plantation presses in every section of the Country, Merchants in the interior may deal in them with greater security than in rope. The reduced bulk and superior condition in which iron-bound bales are de livered will soon effect a discriminating rate of freight, that will make it pay to adopt them in place of rope.

A Cheap Cotton Press ARMERS, BEFORE YOU BUY A Press or build a Screw, enquire into Godwin Cotton Press.

Hear what the tollowing reliable gentle-I have seen Mr. J. H. Godwin's Cotton Press work at Vr. P. E. Smith's plantation. any other mode of packing cotton, and saves both time and labor. W. R. SMITH.

I have used the above mentioned Press nd consider it the best I ever saw for pack THOS. J. VAUGHAN. ing Cotton. I have packed about 100 bales of Cotton with Mr J. H. Godwin's Cot on Press, and take pleasure in recommending it to the farmers as a great labor saving machine. It does not cost more than half as much as a Screw, and is worth twice as much. It is so convenient and takes fewer hands to do as much work as a screw. I would pay the price of a Press, rather than allow

I have packed about 70 bales with God win's Cotton Press, and am certain it is the best, cheanest, most compact, and durable press in existence, costing only half at first, and lasting twice as long as a screw. PETER E. SMITH.

I have never seen the Cotton Press of Mr no. H. Godwin at work, but have no doubt from the certificates of the gentlemen above that it performs all they say of it. I know them to be gentlemen of character and veracity and that their statements are entitled RICH'D H. SMITH.

The last name is one of our most honora ble and respectable citizens, well known as a former member of the Legislature. I o fer this Press as combining more advantage for packing than any now in use; it is adapt ed to large or small farms, and is so simple and cheap, that any good mechanic can build t. It is well adapted to
